INTRODUCTION

Data on governments cover every level of government and subjects ranging from property taxes to prosecutions, from labor contracts to liquor monopolies.

Federal, State, and local government officials in administration, fiscal planning, and other areas, use governments data widely. With these data, officials can estimate the economic activity of the government sector for the *U.S. National Income and Product Accounts*. Officials preparing budgets and projections frequently use data on governments and demographic trends. Cities, for example, can compare the costs of their own operations with others and may use statistics on past performance to anticipate the future.

Academic institutions use the data in economic, public finance, and political science research. Community action agencies, developers, regional planning groups, chambers of commerce, and citizens' groups need data on property values, tax bases, other sources of revenue, amounts spent on public services, and public employment.

The Bureau gets data on governments from censuses, current surveys, and in some cases administrative records.

Data cover public employment and government finances, including revenue, expenditures, indebtedness, and cash and security holdings.

Censuses and Surveys

Data on governments in the United States really began in the decennial census of 1840 with the number and kinds of some schools and pupils. After that, a census of governments occurred about every 10 years from 1850 to 1942. Beginning with 1957, after a 15-year gap, the Bureau has taken the census every 5 years (for years ending in "2" and "7").

Early censuses dealt with property values, local property taxes, and schools and their revenues. Later censuses added questions on public debt, utility systems, and public finance. In the 20th century, interest has focused on revenues and expenditures; estimates of the national wealth, by State and class of property; and the analysis of public debt.

In addition, the Census Bureau conducts a number of periodic surveys and prepares special statistical studies. It also conducts surveys for other Federal agencies. For example, the Census Bureau collects data from criminal justice agencies for the Department of Justice.

Many of the census and survey data are collected by mail, but some are either extracted from published records or obtained by Bureau representatives. The returns from the censuses and surveys of governments (in contrast to others required by Title 13 of the U.S. Code) are voluntary and, except for the sales price of individual property, by law, need not be kept confidential. Careful review helps ensure correct classification and comparability among governments.

The principal types of governments covered are Federal, State, county, municipal, township, school district (dependent and independent), and special district. The program also includes Puerto Rico, Guam,

and the Virgin Islands. Throughout this catalog, data and reference products with statistics and other information for States also include the District of Columbia, though it is not specified.

Some governmental topics are covered outside this chapter. For references to payments by governments to welfare or social security recipients and other individuals, look under "Governments: Benefits, cash or noncash" in the subject index. For data on governments collected by other agencies, refer to the *Statistical Abstract of the United States*. (see abstract number 90 in the General and Reference chapter). Census Subjects

The censuses cover the following four major subjects:

Governmental organization—number, characteristics, and descriptions of local governments, by type; and data on popularly elected officials.

Taxable property values—assessed valuations, measurable sales and assessment/sales price ratios, and data on nominal and effective property tax rates.

Governmental employment—number of public employees and payrolls for the month of October; extent of employee organization; governmental labor-management policies and agreements; and government costs for selected employee benefits.

Governmental finances—revenues, by source and type; expenditures, by function, character, and object; debt and debt transactions; and cash and security holdings.

Survey Subjects

The Bureau's regular surveys include the following:

- Annual Federal expenditures
- Annual financial statistics for State and local governments
- Annual finances of employee-retirement systems of State and local governments
- Annual public employment
- Quarterly summary of Federal, State and local tax revenue
- Quarterly finances of selected public employee-retirement systems
- Quarterly Federal assistance awards

For more recent references to governments data products, see the following section, entitled **Data Products Issued**

October-December 1994. Listings of subsequent releases appear in the *Monthly Product Announcement* and the *Daily List* (see abstracts numbered 44 and 15.5, respectively).

NOTE—The number above the abstracts makes the indexes easier to use. It should not be used for ordering products.

DATA PRODUCTS ISSUED OCTOBER- DECEMBER 1994

The following data products were issued during the last quarter of 1994. Abstracts for some may appear in this chapter; generally, though, they were published too late for an abstract to be prepared. **Unless noted otherwise, these data products may still be available from the Government Printing Office (GPO). Orders should include the GPO Stock Number. However, availability is subject to change and reports may be superseded. For the latest ordering information, contact Customer Services, Bureau of the Census (301-457-4100).**

This list excludes periodicals issued more often than once a year. Any such periodicals are described later in this chapter and listed in appendix A.

Reports carried in full or in part on CENDATA, our online information service, are identified by the word "CENDATA" in brackets at the end of the report listing.

1992 CENSUS OF GOVERNMENTS

The 1992 Census of Governments was collected during the first half of 1993. (See additional background information at the beginning of this chapter.) The data focus on State and local governments in the United States, featuring such subjects as value of taxable property, number of public employees, payrolls, revenue, expenditures, debts, and financial assets.

Census data products released through September 1994 are described below. More recent products may be listed in the Data Products Issued October-December 1994 section above.

For information about products from the 1987 census, see the *Census Catalog and Guide: 1994* or contact Customer Services (301-457-4100).

SURVEYS OF GOVERNMENTS

The statistics presented in the recurrent reports described below are derived from surveys conducted by the Census Bureau in the years between censuses. Data cover the finances and employment of the Federal Government and State and local governments throughout the country.

These statistics appear in four different series of reports (GE, GF, GR and GT) published either annually or quarterly. Also, the Bureau prepares two other series, *Federal Expenditures by State for Fiscal Year (Yr.)* and the *Consolidated Federal Funds Report*. In addition, some of the survey data are on computer tape.

Abstracts of survey products appear in this order (following a directory abstract): 1) Federal expenditures, 2) government employment, and 3) government finance.

These data, along with per capita figures, reflect recent trends in revenue, expenditures, and indebtedness of all governments. Data on revenue are shown by source and level of government; expenditures, by function, object and level of government; indebtedness, by long- and short-term debt; and cash and security holdings, by purpose and type. Summary statistics also cover government-administered insurance trust and employee-retirement systems.

State and local government data include: expenditures by function; indebtedness and debt transactions; capital outlay in total and for selected functions; per capita amounts for selected financial items; and relation of selected items to personal income.

This report also details: Federal expenditures for selected categories; utility revenue, expenditures, and indebtedness by type; revenue and expenditures, by State, of locally operated public utilities; and selected items of finances by type of local government. Population estimates as of April 1, 1990 and July 1, 1991, and personal income for calendar year 1990 are also included.
